- Anatomical limits of the original Full Arch on 4/6 treatment
- Protocol evolution for complex cases
- Trans-sinus, pterygoid, zygomatic and trans-nasal implants
- Surgical techniques explained through step-by-step videos
- Key factors for treatment success
- Scientific literature review

Hands-On Session

3:30 PM - 5:30 PM

- Practical session on models
- Placement of trans-sinus, pterygoid, zygomatic and trans-nasal implants
- Practice with surgical components and instruments
- Application of advanced Full Arch protocols in a controlled environment

The clinic

Welcome to Tommaso Grandi Dental Clinic.

Here, implantology is performed in a cutting-edge hospital-grade setting. You can watch my operating room, observe my workflow, and understand why every detail matters.

2 hospital-grade surgical rooms

High-efficiency air filtration, medical gases, and airtight negative-pressure doors to maintain a sterile environment.

Doctor prep room + patient prep room

Separate pathways for total control.

Recovery lounge

Reclining chairs for safe post-sedation recovery.

+ 6.200 implants/year

Over 900 immediate-load Full Arch restorations per year
