THE COURSE

COURSE OBJECTIVES

An intensive training experience designed to turn theoretical knowledge into real clinical confidence.

The **Surgical Immersion Week** is a practical course on patient focused on **upper and lower Full Arch rehabilitation**, designed to allow participants to personally manage every stage of treatment: from case planning and surgical management to post-operative analysis.

During a full week of clinical immersion in Fortaleza, each participant will be directly involved in the procedures, acting as **primary surgeon on 5 full arches** and working closely with experienced tutors every day.

Pre-surgical briefings, surgical sessions and case reviews will help participants consolidate a method that can be applied to their daily clinical practice.

OBJECTIVES

EACH PARTICIPANT WILL PERFORM

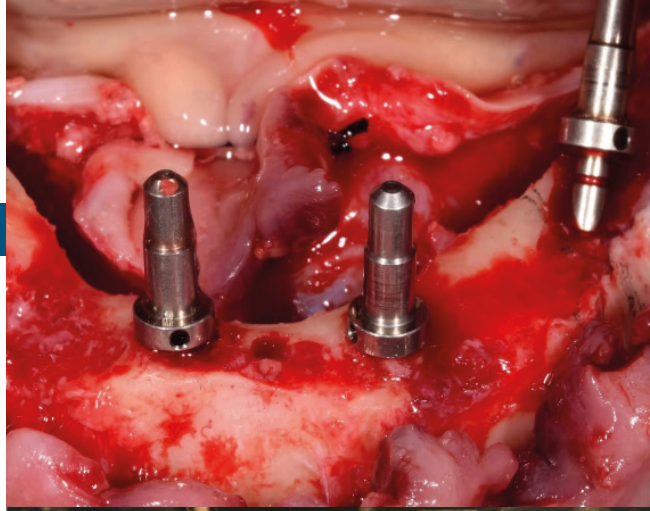

5 FULL ARCHES using the Full Arch technique as primary surgeon

A total of **20 IMPLANTS** as primary surgeon

Assistance during **5 SURGICAL PROCEDURES** as assistant surgeon

WHAT WILL YOU BE ABLE TO DO AFTER THE COURSE?

- Properly plan atrophic cases
- Confidently expose the inferior alveolar nerve
- Correctly identify the maxillary sinus
- Correctly place tilted implants
- Manage Full Arch cases in your own practice

OBJECTIVES

COURSE BENEFITS

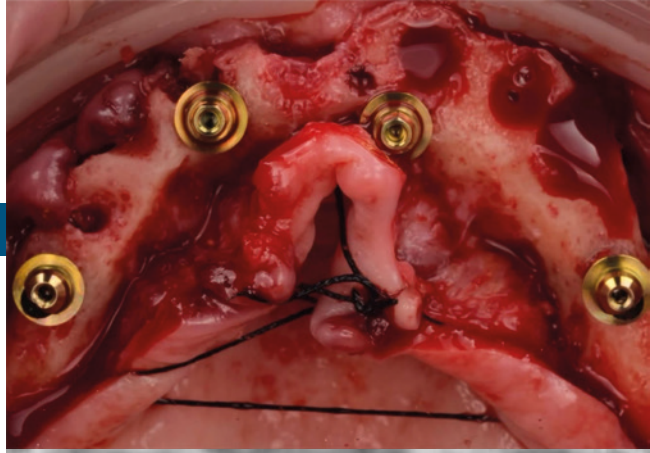

- Opportunity to observe the lecturers in their own practices
- Preferential access to Full Arch Academy events and courses
- Educational materials as clinical cases, photos, Full HD videos and protocols
- Certificate of attendance
- Ongoing tutoring through the Academy chat

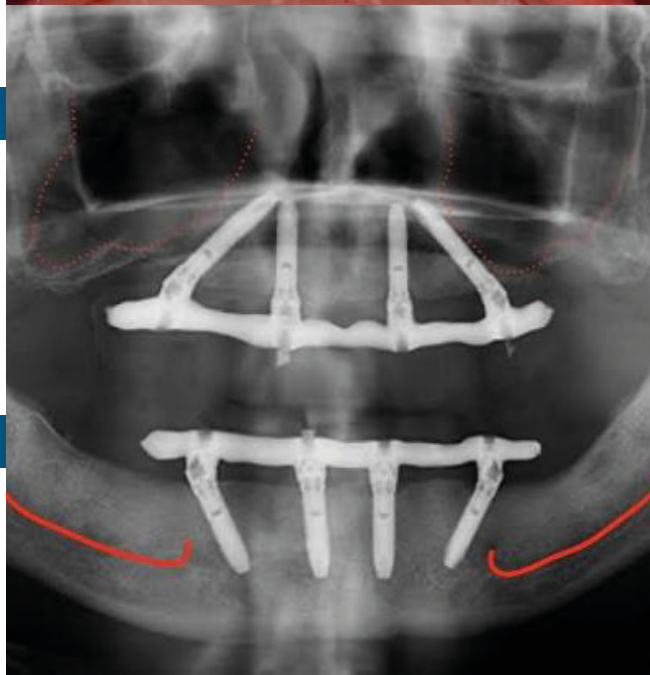

WHY CHOOSE FULL ARCH ACADEMY?

- You will perform 5 full arches as primary surgeon
- You will be guided step-by-step in the surgical procedures
- Ongoing support for your surgical planning once you return to Italy
- Surgical procedures adapted to each participant's experience level and preferences

WHY TAKE A COURSE IN BRAZIL?

- It is a hands-on patient course
- You will gain confidence in exposing the inferior alveolar nerve and identifying the maxillary sinus
